What is the People's Market Dashboard System (PMDS)?

The People's Market Dashboard System is a customized information technology platform developed for the People's Market hosted by PlayGrowLearn (PGL) and Multnomah County REACH. It integrates secure data collection, real-time dashboards, and automated reporting to improve market operations, vendor management, and funder accountability. It was developed from the original *Homegrown Dashboard System©* and customized for use through a participatory design process involving PlayGrowLearn and REACH for year 2 market implementation.

Feedback from vendors, PGL, and REACH as well as firsthand observational data and review of documented data collected from year 1 revealed several important successes and **key challenges to year 1 market success**. These included but were not limited to:

- Unreliable and incomplete data on market activities, benefits and sales
- A complex and cumbersome physical token system for allocating and transacting benefits with attendees and vendors
- Extremely long attendee lines at the check-in table
- Delays in PGL payment remittances to some vendors and in some funders' payment remittances to PGL

The PMDS is designed to address these and other administrative, logistical and data related challenges by providing and enhancing:

- Data collection consistency, validity, and usefulness
- Data management and data analysis capacity
- Vendor invoicing and payment documentation clarification and timeliness
- Consistency and Clarity of Market Operations

All People's Market vendors are required to use the PMDS in order to participate in the year 2 market. The subsequent sections in this guide detail the information technology components of the system, user-specific guidelines

around how and when to use it, the technical assistance resources provided to support the use of the system, and the administrative procedures and policies for the market manager to implement to enable effective use of the system and optimal market day outcomes. Use the table of contents to help you navigate to the section(s) that applies to your role as either a market vendor, market manager (PGL staff or volunteer), or market funder.

Who Uses the PMDS and How?

Market Manager (PGL)

PGL staff and volunteers use PMDS for clocking in and out on market day, checking vendors in and out of the market; documenting rental equipment and PGL equipment inventory management; documenting CSA pickups from enrolled members, registering new attendees and checking in returning attendees; loading attendee mobile wallets at check-in; and item sales tracking.

PGL leadership use PMDS to reconcile and complete vendor invoices; to generate and approve invoices and document receipt of payment from funders; to obtain and document required paperwork from approved vendors; to keep track of contract details and requirements, and to make data-driven decisions regarding organization and market management.

All Market Vendors

There are 4 types of vendors recognized in the PMDS: **farmers**, **value-added producers (VAP)**, **hot food vendors**, **non-food retailers**, **entertainers,** and **educators**. Generally speaking, entertainers and educators will not engage with the PMDS system directly beyond being registered as vendors, uploading their required documents, and being checked-in and checked-out of the market by PGL at the vendor check-in table. They can still access the vendor portal and view dashboards to learn more about market outcomes, but most of the information will not apply directly to them as neither educators nor entertainers

are expected to be selling anything directly to attendees at the market and the details of their compensation (if any) are expected to be worked out with PGL separately from the PMDS system.

For all other vendors, only the primary contact of the vendor business and up to 2 additional individuals (optional) authorized to represent their business will use the PMDS. These additional individuals will be listed as the secondary (2nd) and tertiary (3rd) contact of each vendor business. To use the PMDS, they will need access to their private **vendor login information** (Vendor ID and Vendor PIN) as well as the shared Vendor Portal password, which is shared across all Market vendors. Given this, vendors must choose these individuals very carefully. *It is the responsibility of each vendor to ensure that this shared Vendor Portal password and their unique vendor login information is kept private*.

All vendors will use the PMDS to register as a vendor, communicate about plans for the upcoming market day, process all market transactions, and submit invoices to PGL. Vendors may also choose to use it to monitor their own market sales and other market information through the dashboards as interested.

Current Vendors

Current vendors are all of the vendors who participated in year 1 of the market who were invite back to participate in year 2 of the market. They will use this system to register and submit their required paperwork by the specified deadline that PGL specifies. They will do this by first completing the Vendor Registration Form followed by the Document Upload Form (using the Vendor ID generated by the Vendor Registration Form).

Future Vendors

Future vendors will use the PMDS to apply to become a vendor in the People's Market. If/when approved by PGL, they will proceed to use the system in the same way that current vendors will and will submit the required information through the Document Upload Form by the date that PGL specifies.

Funders

The PMDS recognizes four organizations as funders of The People's Market-Multnomah County REACH, Wallace Clinic, Oregon Food Bank (through Outgrowing Hunger), and the Oregon Department of Agriculture. The funders provide reimbursement to PGL primarily for its provision of **financial benefits** (PGL Bucks, Wallace Bucks, Community Bucks and SNAP+ Bucks) rendered to attendees through the PMDS mobile wallet. PGL, in turn, disburses payment to market vendors according to the reconciled debt owed for their transacting of these benefits at the end of each market.

Funders can choose to what extent they wish to engage with the PMDS system as agreed upon with PGL; however, **ALL funders are requested to complete the Funder Payment Remittance Form upon receipt of each PGL invoice**. This is a brief form that should take no more than 2 minutes to complete. Doing so indicates to both PGL and the market vendors that the invoice has been received, sent for payment, and the approximate date that PGL can expect to receive that payment. This form is described further in the Data Input Forms section of this document and can be found within the Funder Portal of the PMDS website.

System Components

There are five central IT components within the PMDS: a centralized **database**, **data input forms**, **dashboards**, unique identification numbers (**unique IDs**), and a virtual "**mobile wallet**". The dashboards and forms are housed within a **website** where all users can access the dashboards and retrieve the forms that they will use. These forms are all digital and will be submitted online, which requires that the user have an internet connection to access and submit the forms. The term "**portals**" is used to describe the access-restricted areas of the website where each user group can access the forms and dashboards that pertain to them. Each user group will receive the shared password to their portal from PGL. There are also **automatic notifications** built into PMDS which will be

disseminated via email and/or text to designated recipients, and a **mobile wallet web interface** where attendee mobile wallet balances can be checked by attendees in real time from a web link (an internet connection is required for this). Vendors will also be able to view attendee mobile wallet balances through the Transaction Form at the point-of-sale.

Database

The PMDS **database** is located in the Smartsheets digital cloud. It is the location where all market-related data collected through the data input forms is securely stored. The database holds a record of every registered attendee, CSA member, produce item, vendor, transaction, benefit dollar (allocated and transacted), equipment rental, and invoice processed through the market. This secure database is accessible only to the UC IT team for the year 2 market.

Data Input Forms

All data about the market is added to the PMDS database through user-friendly web-based, **data input forms**. These forms have fields with drop-down menus, text-write in responses, checkboxes, data validation functions, and retrieval features that enable it to pull information directly from the database to autofill certain fields.

The table below contains a complete list of all PMDS forms and a brief description of each. Importantly, **only a subset of these forms are completed by any one user group.** Detailed instructions about which users complete which forms are provided in the subsequent sections and can also be found in both the online portals next to each form. The portal for each user group contains only the forms that user group (vendor, market manager, or funder) is required to complete.

Form Name	Description
Attendee Registration Form	For registering first time market attendees (first time in year 2) to set up their Neighbor ID which creates their mobile wallet.

Return Attendee Form	For checking in each return attendee to the market and reloading their mobile wallet.
CSA Pick-up Form	For documenting REACH-PGL CSA pick-ups.
CSA Enrollment Form	For enrolling families into the REACH-PGL CSA.
Market Vendor Request Form	All year 1 vendors and prospective market vendors must complete this form once to apply to participate in the market.
Vendor Document Upload Form	All year 1 vendors and approved new vendors complete this form to submit all outstanding paperwork required to participate in the market. Complete this form as many times as needed.
Upcoming Market Form	All vendors must complete this form by Friday end of the day before each market day.
Transaction Form	Vendors complete this form to process all point-of-sale transactions. This form is accessed via QR code scan for all registered attendees and manually through the vendor portal for guest attendees.
End of Market Invoice Form	All vendors complete this form immediately after their last transaction at every market to generate an invoice for PGL.
End of Market Payment Reconciliation Form	PGL completes this to reconcile payment owed to vendors at the end of each market.
Vendor Payment Remittance Form	PGL completes this to document the remittance of payment to vendors.
Vendor Check-in and Check-out Form	For checking vendors into and out of the market and processing PGL equipment rentals.
Attendee Experience Survey (End of Market)	For gathering attendee feedback on their experience at the market weekly.
Attendee Experience Survey (End of Season)	For gathering attendee feedback on their overall experience at the market at the end of market season).
Item Inventory Form	For PGL documentation of market related equipment inventory updates.
PGL Personnel Market Check-in and Out Form	For PGL personnel time and role tracking on market day.
Contract/Grant Information Form	For PGL market-related grant and contract information documentation.
Funder Payment Invoice Form	For PGL market invoices sent to funders.
Funder Payment Remittance Form	For funders remittance of payment to PGL.
Funder Payment Received Form	For PGL documentation of payment received from funders.

Data Visualization: Dashboards and Dashboard Sets

There are three primary data **dashboard sets,** or groups of dashboards, within the PMDS. These are the shared dashboard set, the contract dashboard set, and the vendors dashboard set. All vendors, PGL and funders (as requested) will have access to the shared dashboards. Development of the other dashboard sets (vendor and contract) is forthcoming; all dashboards that currently exist are

part of the **shared dashboard set**. The dashboards are all built within Tableau software and stored within a secure UC server. The dashboards are embedded within the website and are accessible to anyone with password-restricted access through the respective portals.

All current vendors will be given access to the **vendor portal** login of the website prior to the start of the market. **The password they will use is the same password shared among all vendors. Given this, it is essential that no one shares this password with anyone.** This portal contains all forms and dashboards that they will need access to in order to use the PMDS. PGL can give all newly approved vendors access to this portal after they have been approved and should ensure that they know how to use it through an orientation and/or training.

Shared Dashboard Set

The Shared Dashboard Set is a group of 6 dashboards that are accessible to all user groups (vendors, market manager, and funders). It contains information about key aspects of the market that connect to the interests and functions of all user groups. In contrast the Contract Dashboard Set and Vendor Dashboard Set (both tentatively planned for year 3), will be access restricted to the market manager and REACH.

General Dashboard: The General Dashboard contains summary information about market performance that may be useful to any user group. Use this dashboard to explore overall market performance related to sales, attendance, and produce (sold and remaining).

Benefits Utilization Dashboard: Use this dashboard to explore benefit use patterns among attendees with market-related financial benefits (SNAP+ Bucks, Community Bucks, PGL Bucks, and Wallace Bucks). It also covers demographics of attendees who shop with benefits and amounts of benefits allocated.

Market Sales Dashboard: This dashboard provides useful information about sales patterns, highest selling items, and the patterns of benefits-based v. out-of-pocket sales.

Invoice and Remittance Dashboard: Use this dashboard to understand market invoice and remittance patterns related to vendor invoices to PGL and PGL invoices to funders.

Market Attendance Dashboard: This dashboard provides information about market attendance statistics over time, by demographic group, and attendance frequency. Use this dashboard to better understand the distribution, demographics, and attendance patterns of market attendees.

Vendor Information Dashboard: The vendor information provides information about vendor types, services and products, and vendor attendance patterns. It also tracks which vendors have outstanding documents (e.g. W-9).

Unique IDs

The PMDS generates several unique identifications numbers (IDs) that enable the tracking of key information about the market. These IDs are related to market attendance, sales, CSAs, rental equipment, vendors and invoices numbers are all identified by a unique ID or invoice number. Certain forms generate each of these numbers. Any unique ID with "PIN" in the name is something that the corresponding user group should commit to memory. Again, **Vendors MUST keep their Vendor ID and PIN secure at all times.** Similarly, **all attendees are responsible for keeping their Neighbor ID and Attendee PIN secure at all times**; both of these are contained within the **virtual ID card** that all registered attendees will receive by email at the time of registration. **None of these unique IDs can be replaced at this time**. The table below summarizes the list of Unique IDs generated by the PMDS.

Unique IDs	Summary
Neighbor ID	Assigned to each attendee household at first market attendance. Used for tracking attendee benefits and market purchases through the mobile wallet.
Attendee PIN	Short version of the Neighbor ID.
Vendor ID	Assigned to each vendor once/if their application to be a market vendor is approved.
Vendor PIN	Used for quick retrieval of Vendor ID.
Vendor Invoice #	Identifies each unique vendor invoice to PGL.
CSA Member ID	Identifies each individual household that is enrolled in the REACH-PGL CSA program.
Contract ID	Identifies each PGL contract or grant that is funding the market.
Funder Invoice #	Identifies each unique PGL invoice to each funder.
Item ID	Identifies each market-related piece of equipment that PGL owns and rents.

Mobile Wallet

The "mobile wallet" is the component of the PMDS that enables attendees to make purchases with any of the four market **benefits.** The PMDS recognizes the benefits as alternative ways that people might pay for produce and other food items at the market (**SNAP+ Bucks, Wallace Bucks, PGL Bucks, and Community Bucks).** The term "mobile wallet" refers to the forms and digital web interface where benefits are loaded, stored, viewed, and transacted at the market between PGL, the attendee, and the vendor. It enables accurate invoicing and remittance of payment for sales involving use of these benefits. This system eliminates the need for the multi-colored token system by digitizing these benefits and documenting them accordingly. SNAP+ Bucks (indicated in yellow across the system) are the only benefit that remains as a physical token-based transaction process in year 2; this is due to a policy of the Oregon Department of Agriculture regarding SNAP usage. These tokens will be physically given to attendees at the point of registration, and they will also be reflected in the mobile wallet for those who have SNAP and which to use their SNAP dollars at the market. Each SNAP token allocated is equivalent to $2. Importantly, Double Up Bucks are automatically calculated at the time that

SNAP is added to the mobile wallet at the registration table, and so the amount of tokens individuals receive reflects SNAP+Double Up Bucks (SNAP+).

All other benefits are allocated only through the mobile wallet (thus no other physical tokens used) and are loaded only at the point of initial registration (new attendees only) and market check-in (returning attendees). PGL personnel operating the registration table load the mobile wallet with the applicable benefits. **Even attendees who do not have benefits will receive a mobile wallet at the time of registration**.

Mobile Wallet Web Interface

When attendee accounts are created, they will automatically receive an email (at the email address they provided at registration) with a PDF attachment. This PDF attachment is their **virtual ID card.** The virtual ID card contains a QR code, the names of all registered account users (up to 4 additional household members plus the person who registered), their status as either a Wallace client and/or REACH-PGL CSA member, and a hyperlink to a webpage that provides a real-time view of the current balances of the benefits in their mobile wallet account. **The names listed on the virtual ID card are the ONLY authorized users of that mobile wallet account**; they will have access to that family's benefits for use at the market. Through the link on the virtual ID card, they can view the balances within their mobile wallet and know exactly how much they have left to spend at any given time (note- viewing the balances through the link is dependent upon them having an internet connection and the speed of that internet connection).

All benefit balances carry over from the previous market until the last market day of the season after which all balances revert to zero. Importantly, attendees cannot overdraw the balances on any of their benefits, and they CANNOT reload the mobile wallet with more benefits on the same market day. So whatever amount is loaded onto the mobile wallet at the time of check-in is what they have for that market day. Any additional purchases that they wish to make that day that exceed the balance of the mobile wallet must be made using cash and/or credit/debit (depending on whether or not that particular vendor can

accept credit/debit transactions). Those **non-benefit transactions** (cash and debit/credit) will still take place through the QR code on the attendees virtual ID card, which vendors use to access the Transaction Form for all registered attendees. Non-registered attendee shoppers should be strongly discouraged; everyone should be referred to the registration table) can still make a purchase at the market. However, vendors will need to login to the vendor portal of the PMDS to access the Transaction Form to process those purchases (use guest code **GUEST99** in place of Neighbor ID).

Automatic Notifications

The PMDS will send automatic email notifications to designated recipients when certain events occur. These notifications are intended as alerts, reminders, and warnings for system users about account balances, system issues, CSA membership and vendor status. The following table summarizes each notification and who receives it. For now, all notifications are sent as emails to the email address on file in the PMDS.

Notification	Who Receives it	When Received
Vendor missing one or more overdue documents	PGL; Vendor	Every 3 days past the date vendor is notified by PGL that they are approved
Vendor has been absent from the market for more than 1 consecutive market day	PGL; Vendor	Once following the second absence
New vendor application submitted through Market Vendor Request Form	PGL	Each time the form is submitted
Vendor uploads new documents through the Vendor Document Upload Form	PGL	Each time the form is submitted
CSA member is dropped from the enrollment list	PGL	When any CSA member misses 2 consecutive CSA pick-ups
Rental equipment is returned damaged or not returned	PGL; Vendor	Within 24 hours of the market day

Low expected attendance (Less than half of all vendors) for next market day	PGL	By Saturday 8am of each market day
System down/maintenance in progress	N/A (it will be posted on the website)	When our team becomes aware of a system issue
Attendee total mobile wallet balance drops under $20.00.	Attendee	When the balance drops under the threshold

System Use Instructions for PGL

Forms PGL completes	Description of Use	Frequency of Use
Market Vendor Request Form	PGL must complete this form once before the first day of the market in order to generate its own **Vendor ID** and corresponding **Vendor PIN**. These two unique IDs will be used to document and track all PGL market sales and compliance documents required by the funders.	Once
Vendor Document Upload Form	PGL can use this form to upload and update any required documents for REACH." (Note: Confirm with your REACH contact that about any compliance requirements and preferred processes regarding submitting and updating your required paperwork.)	As often as needed
Upcoming Market Form	Complete this form **by the end of the day every Friday** to let the vendors know what produce items (if any) you are bringing to sell on Sunday, what the culture theme of the day/week is.	Once per market week
Attendee Registration Form	Use this form to register all new attendees (this includes anyone who attended in year 1) to the market at the registration table. This form is to be completed only once for each new attendee household.	Once per new attendee per market
Return Attendee Form	Use this form to sign-in all returning attendees each market day. It includes fields for loading the mobile wallet for all attendees with financial benefits (SNAP+, Wallace, Community, and PGL Bucks)	Once per return attendee per market
CSA Pick-up Form	Use this form at the CSA pick-up table to document all CSA bag pick-ups by currently enrolled CSA members	Once per CSA member pickup
CSA Enrollment Form	PGL will use this form to enroll each CSA member. Once the 100 member enrollment cap is met, PGL will receive an email notification. At this point, PGL should begin making a waitlist (the PMDS will NOT do this for you). If an	Once per newly enrolled CSA member

	opening in membership occurs (after a member misses 2 consecutive pick-up days) they will be dropped from membership and PGL will receive an email, a new member can be enrolled through the form. Members can be enrolled onsite at the market or offsite at other PGL events, but the maximum number of enrollees cannot be exceeded.	
End of Market Payment Reconciliation Form	Use this form to receive and reconcile vendor invoices at the end of each market for vendors making sales at the market. Complete the form once for each vendor in the presence of the vendor at the vendor check-out booth.	Once per vendor per market
Vendor Payment Remittance Form	This form is completed after each direct deposit disbursement of payment has been made to each vendor or after the vendor has picked up their physical check. *(Note: This does NOT include entertainer and educator invoices and payments- the PMDS does NOT handle those transactions as those may involve separate contract terms that are outside of the scope of the PMDS)*	Once per vendor invoice
Market Day Vendor Check-in and Check-out form	Use this form to check in and out all market vendors at the beginning and end of the market on each market day.	Twice per vendor per market (once if vendor doesn't rent equipment)
Item Inventory Form	PGL will use this form to assign each of their non-produce items (e.g. laptops, tablets, chairs, tables and tents) an **Item ID** and document and update its information (including storage location and condition) within their inventory.	Varies- at least once per item
PGL Personnel Market Check-in and Out Form	Use this form to check in and out all PGL staff and volunteers at the beginning and end of the market on each market day	Twice per PGL personnel per market
Contract Information Form	PGL completes this form once for every contract or grant that it receives.	Once per PGL contract
Funder Payment Invoice Form	Use this form to generate invoices for Oregon Department of Agriculture, Outgrowing Hunger, REACH, and Wallace Clinic. Invoices for each will automatically be sent to the PGL email inbox on file that was registered through the vendor registration form (Note: Once generated, <u>you will still need to manually send the invoice to each funder. The PMDS does NOT do this automatically.</u>)	Once per funder per market
Funder Payment Received Form	PGL completes this form after receiving payment remittance (via direct deposit or check) from market funders.	Once per PGL invoice per funder

PRE-MARKET INFORMATION FOR PGL

Assigning Personnel Roles

All PGL personnel will help with set up and tear down of the market. Each staff member should be trained in advance about their specific task to fulfill during market hours so that they can confidently and successfully perform their role at the market. Prior to the start of the market during set up time, PGL staff should check-in all PGL personnel and vendors.

Staff 1 & 2: Attendee registration/ check-in

Two staff members must be assigned to the check in table for every market. One should work exclusively with new attendees in a separate line using the **Attendee Registration Form**. Staff 2 will operate the other line which is for returning attendees only. They will complete the **Return Attendee Form** on behalf of the attendee. Both staff will communicate with Staff 3 regarding any SNAP benefits. Both forms are completed by staff who ask attendees the form questions. These forms are accessed directly from the Market Manager Portal on the PMDS website.

Staff 3: SNAP+ Tokens

Staff 3 will be at the PGL Main Table working together with Staff 1 and 2. This person is fully responsible for the distribution of SNAP+ tokens. Staff 1 and 2 will communicate to staff 3 about which attendees require SNAP transactions.

If the attendee wants to load SNAP dollars onto their mobile wallet, Staff 3 will take their EBT card, charge the amount that they want loaded (whole dollar amounts only), and then hand over the card and the physical SNAP+ tokens to the staff person working with that attendee. Staff 1 or 2 will tell them how many tokens to hand over because both the Attendee Registration Form and Return Attendee Form will display the number of

SNAP+ token equivalent to the amount of SNAP dollars the attendee want to load (Double Up Bucks value included automatically). This process will happen while that attendee is at the front of the line working with either Staff 1 or 2.

Staff 4, 5 & 6: CSA Distribution

Staff 4, 5, and 6 will run the PGL CSA distribution. There are three main tasks at the table: running check in, handing out bags, and assisting with the line management. Each staff member will help keep the line running smoothly.

Staff 7: PGL Sales Table

Staff 7 will run the PGL sales table. This will include selling plant starts and filling out the **Transaction Form** and the **Vendor ID** unique to PGL that was generated from the Market Vendor Request Form. If PGL is not selling starts or garden supplies at a particular market, Staff 7 can become a floater.

Staff 8+: Floaters and Volunteers

Any additional staff and volunteers should be floaters, walking around the market and helping as needed. In particular, floaters should be well-trained on all PMDS policies to be able to troubleshoot questions around the mobile wallet, registration, CSA distribution, and all other market components.

Training Vendors

Vendors will need to undergo training before the first day of the market. It is recommended to host a two-part training: a big-picture overview of the system and an in-person dress rehearsal. It is critical for the training to cover why the PMDS is being used as well as how to use it. Allow opportunities for vendors to try out using all of the forms before the market starts. PGL can help vendors understand how the system can benefit them through an orientation to the

dashboards. It is critical to emphasize the importance of vendors having smart phone access to the success of the market. This is an essential component to the PMDS functioning properly.

Here is a list of some of the key process to cover in the training:

- Benefit types and qualifications – understanding the color-coded system
- The importance of keeping all unique IDs and passwords safe
- Accessing the data input forms through the portal and pulling it up on market day
- Completing the Upcoming Market Form
- Market day checking in and out process
- Processing transactions through the mobile wallet
- Using the paper-based in the event of an emergency
- End of market payment reconciliation process

Training Funders

The primary contact for each of the four funders needs to be trained in their role in using the PMDS. At this point, there is only one form that funders are asked to fill out. It is up to PGL to request that each funder completes this **Funder Payment Remittance Form** for each invoice received and to explain to them how to complete it. This is a very short form that funders are to complete to acknowledge the receipt of the invoice from PGL, the approval and/or correction of the invoice, and when payment remittance can be expected. This form is intended to increase transparency, equitable partnership, timely payment, and better planning for all participating users, especially PGL.

Packing Lists

PGL should bring the following supplies and materials to every market:

Market Supplies:

- Laptops and tablets

- Technology chargers
- Blank cards and pens to write Neighbor ID
- SNAP terminal
- Signage
- PGL tables (main, CSA sales)
- CSA supplies- bags, scale, etc.
- Rental equipment

Tech-free Supplies:

- Printed forms (9 types total)
- Folders for form organization
- Pens
- Clipboards
- Yellow tokens
- Token bags

Signage Needs

- Clear signage will be required to ensure smooth market operations. These include, but are not limited to:
  - Welcome signs with instructions on how to register and shop at the market.
  - A sign to delineate lines for new attendees and returning attendees.
  - Policy signage to explain rules such as only going through the registration line one time.
  - Signs for each vendor booth displaying what benefits are accepted.
- All signage should include PGL contact information and a QR code to the attendee feedback form.

CSA Enrollment, Drops, and Waitlist Management

PGL staff enroll community members in the CSA program, often through participation in other PGL programs. Enrollment is captured through enrollment form. We use the term "CSA participant" and "CSA Enrollee" interchangeably throughout this user guide and the PMDS to refer to any individual or family who is currently enrolled in the REACH-PGL CSA in 2025. These participants may or may not be registered market attendees at the time of CSA enrollment, but they will have to become registered at the market before they can pick up their produce bag (attendee registration is a one-time event).

PGL staff enroll community members in the CSA program primarily off-site through their participation in other PGL programs using the **CSA Enrollment Form**. PGL should notify all CSA participants at the time of enrollment about the policy that they will be dropped from enrollment if they miss more than 2 consecutive pick-up days. PGL staff will receive an email notification when a CSA participant misses 3 consecutive market days, at which point they will be automatically dropped from enrollment. PGL must notify any dropped CSA participants immediately when they are dropped (explaining why) and maintain a waitlist families that can be enrolled (via the form) when this opening in enrollment occurs. Families who are added from the waitlist must be notified directly by PGL so that they plan to be present at the market for pick-up. The waitlist should include all necessary information for PGL to fill out the CSA Enrollment Form on their behalf. PGL must be sure to be mindful of the CSA enrollment number at all times and the exact amount of openings if/when an opening occurs; otherwise, anyone promised a CSA when the CSA is at capacity will not be able to be enrolled. In this case, it probably makes sense to put that family on the waitlist.

New Vendor Approval

- All existing vendors will need to register through the PMDS system to ensure their information is entered into the system. This will

generate their Vendor ID that they will use through the duration to the market season.

- With existing vendor demographics and business information collected, PGL can strategically conduct outreach to the community to recruit vendors to fill voids in current lineup.
- PGL staff monitors applications that come in through this form. PGL checks if it fits into current needs, including type of business. Check if vendor is a registered business. Once a decision is made, PGL staff member reaches out to the vendor with an approval or denial, and explanation. If approved, make sure Vendor Document Upload Form is sent in follow up to confirm if they will be renting equipment. PGL will also complete this form itself so that it will have its own Vendor ID and Vendor PIN.

Weekly Vendor Confirmation of Market Attendance

- Thursday morning before each market, send Upcoming Market Form to vendor list and require response by end of day Friday to ensure spot in the market.
- PGL must decide protocols around lack of response: for example, if someone doesn't respond, they can't set up that weekend. Or if you have regulars, you can assume they are coming unless you hear otherwise. See vendor fee recommendation for accountability tool.

Item Inventory Management

The PMDS enables PGL to keep a detailed inventory of its market-related equipment. Use the **Item Inventory Form** when PGL acquires, relocates, or discards equipment. Specifically, this equipment includes PGL assets of laptops, tablets, tables, chairs, tents, and weights. Note that this does NOT currently include relatively invaluable resources like tokens, pens and clipboards. The form autogenerates an Item ID for each newly entered item. Use that Item ID and write it on a tag on each item so that it is plainly visible, legible,

and not easily rubbed off. Use the same form to update the status and/or location of existing items and to input new items into the PGL inventory.

Contract & Grant Information Input

PGL staff use this Contract Information Form to enter and organize all contract information for different funding sources.

MARKET DAY INFORMATION FOR PGL

Market Day Set Up:

Personnel Sign In and Vendor Check-in

- Staff check in at main table with **Personnel Market Check-In and Out** form upon arrival. Vendors check in at PGL Main table with PGL staff wo fill out **Market Day Vendor Check-in and Check-out Form**. Vendors who need to rent can do so at this time through that form.

Table Set Up

- *Main table:* Set up the PGL Main Table with 2 tablets/laptops and SNAP equipment, including tokens. Set up signage. Connect to wifi. Pull up forms for market use: **Attendee Registration Form; Returning Attendee Form; Market Day Vendor Check-in and Check-out Form; PGL Personnel Market Check-in and Out Form; CSA Enrollment Form.**
- *PGL Sales Table:* Set up PGL sales table with computer, starts, seeds, and any other supplies for sale. Connect to wifi. Pull up **Transaction Form**.
- *CSA Table:* Set up table, computer, produce, bags, and other supplies. Connect computer to wifi. Pull up **CSA Pick Up Form**.

During the Market:

Attendee Check-In

- PGL checks in new and returning attendees with **Attendee Registration Form** and **Returning Attendee Form**. Returning attendees' information autopopulates with input of Attendee PIN. PGL must verify that the information is correct and that the name of the person checking in reflects one of the names on the account. **Only check in one person per attendee account, even if more than one person from the same account is present.** Attendee should be asked provide some sort of identifying document with their name on it to ensure that they are authorized to use the account.

- For all new attendees, they will receive an email with a PDF attachment. This is their **virtual ID card**, which they need to keep safe and will use at each market to access their mobile wallet. The virtual ID card contains the names of all registered account users and has a QR code and link to the live mobile wallet interface where attendees can view the balance of their mobile wallet. Attendees will show the QR code to vendors when making a purchase, which vendors will scan to access the transaction form and view the attendees mobile wallet balance for deductions. Note: deductions from the mobile wallet only occur if there is a balance in one of the benefits in the mobile wallet. Otherwise, attendees will have to pay out of pocket (using cash or card). Either way, all attendees must present their virtual ID card to make a purchase at the market.

CSA Distribution

- PGL fill out **CSA Pickup Form** at the table for all CSA enrollees who have registered (if new to the market) or checked in (if a returning attendee) at the registration and check-in table. PGL must ensure

that the individual receives the correct bag size based on the information displayed on the form when the CSA enrollee number is entered. We recommend having one staff working sign in, one distributing bags, and one floating to help move attendees along. Pre-bag the produce to ensure streamlined distribution and easy data collection (number of each bag size x weight). We recommend having a discard table or bin where folks can leave or swap out produce that they won't eat due to it being pre-bagged.

PGL Sales

- PGL staff sell plant starts or other garden items with **Transaction Form.** If PGL is not selling anything at the market on a given day, the staff member designated for the PGL sales table can support the market floaters.

End of Market Day (on-site PGL activities):

Vendor-PGL Payment Reconciliation:

- After vendors have completed the **End of Market Vendor Invoice Form** following their last transaction of the day, the vendor goes to the main table where PGL staff pull up the **End of Market Payment Reconciliation Form**. This form will autopopulate the total sales for each benefit type generated in the End of Market Vendor Invoice Form. PGL will verify those balances and the total balance due, fill out any additional questions that they form asks, address any outstanding balances owed to the vendor by PGL (these will also autopopulate), and collect and count the number of SNAP+ tokens the vendor collected (the number should match the number displayed on the form). Once this reconciliation form is submitted, an automated invoice is generated and sent via email to both parties. At this point, any vendor who did NOT rent equipment from PGL is free to leave. Note: Only authorized PGL personnel can

complete and submit this form since it involves payment. Before submitting the form, a **PGL Leader PIN** will be required. Three of the unique IDs will be generated for PGL leader use only. One of these PGL Leader PINs will also be required when Funder Invoices are sent.

Vendor Returns Rental Equipment:

- Vendors with rental equipment must return equipment to PGL staff at the main table. PGL staff fills out **Market Day Vendor Check-in and Check-out form** to sign out the vendor, document that the equipment has been returned, and to document the condition of the materials.

PGL Staff Sign Out:

- Staff use **PGL Personnel Market Check-In and Check-Out Form** to clock out when leaving. Someone else should complete the form for them; no PGL staff or volunteer except leaders should complete the form for themselves. This helps to ensure accuracy of the information collected.

POST-MARKET INFORMATION FOR PGL

Payment Remittances to Vendors

- PGL staff pulls up each vendor's profile for that market and triple checks data. Once approved, initiate ACH transfer and fill out **Vendor Payment Remittance Form** to document completion. For vendors not using ACH, prepare the physical check and place it in an envelope. Fill out this form when physical check is picked up.

Invoicing Funder and Documenting Completed Payment

- PGL submits **Funder Payment Invoice Form which** generates an invoice for funders based on the invoice period selected. PGL then sends the generated invoice to the designated funder manually.
- When the designated contact of each funder receives the PGL funder invoice and issues payment, that individual completes the **Funder Payment Remittance Form** to document that the payment is on its way.
- PGL completes **Funder Payment Received Form** when payment has been received.

Other Tasks

- Use **Item Inventory Form** to keep track of PGL assets, including laptops, tablets, and other technology.
- PGL staff use this **Contract Information Form** to enter and organize all contract information for different funding sources. This includes any current or future grants or contracts that fund the market.

System Use Instructions for All Market Vendors

Forms Market Vendors Complete	Description of Use	Frequency of Use
Market Vendor Request Form	All year 1 vendors must complete this before the market season begins. All prospective vendors will also need to complete this.	Once
Vendor Document Upload Form	Ideally, all year 1 vendors complete this before the market season begins and all prospective vendors complete it asap following notification of approval from PGL.	Varies (as needed)
Upcoming Market Form	All vendors complete this by Friday 10am before the market.	Once weekly before each market day

Transaction Form	All vendors complete this at the time of each sale. It is accessed by scanning the QR code on attendees' virtual IDs. For guest attendees, it must be accessed through the vendor portal on the website.	Once per sale
End of Market Invoice Form	All vendors complete this form immediately following the last transaction at every market.	Once per market day

Pre-Market Information for Vendors

All market vendors must complete the **Market Vendor Request Form** and the **Document Upload Form** prior to participating in the market. The registration form will generate a unique **Vendor ID** for that vendor upon submission of the form. Each vendor should record this Vendor ID and securely store it somewhere for future access. The last 5 digits of the ID is their **Vendor PIN**; they will need to commit this number sequence to memory as it will allow them to quickly process transactions and complete forms at the market (the PIN will auto-retrieve the Vendor ID for identity verification and submission of some forms). Without either of these numbers, vendors cannot complete required forms in the PMDS. **At this time, neither of these unique IDs can be replaced if they are lost or stolen, so make sure to store them securely and do not share them with anyone**. Note, the completion of the Market Vendor Request Form constitutes an application that is being submitted to PGL; it is a one-time request to be a registered vendor in the People's Market. If approved, PGL will follow up with each vendor directly with the link to access the Vendor Document Upload form. All returning year 1 market vendors must still complete this form, although it is assumed that they are already approved.

While the Market Vendor Request Form is completed only once by each approved and prospective vendor, the Vendor Document Upload Form can be completed as many times as is needed. This form requires certain key documents to be uploaded (e.g. W9). If a document is expired and needs to be replaced, it can be done through this form. If a vendor has not submitted these forms within 3 days of when the Market Vendor Request Form was completed,

both the vendor and PGL will receive an email notification about missing documents every 3 days until the remaining documents have been submitted.

Market Day Information for Vendors

Vendor Check-in

When vendors first arrive at the market (during the designated arrival time window) they must first check-in at the PGL main table. If the main contact of the vendor business is not present, the 2nd or 3rd contact listed on their vendor registration must be present. Vendors who need to rent equipment from PGL (rental set includes 1 table, 4 chairs, a tent and 4 tent weights) can do so at this time through the check-in process.

Processing Transactions

All vendors (excluding entertainers and educators who have no direct sales at the market) must complete the **Transaction Form** to document and process all point-of-sale transactions at the market. This includes all out-of-pocket transactions. For most market transactions, vendors will access this form by scanning the QR code on the virtual ID card presented by each attendee. Scanning this QR code (using a smartphone or tablet with internet connection) will pull up the form. To complete it, vendors will first input their own Vendor ID number and complete all form fields.

All attendees who wish to make a purchase from a vendor at the market should be **strongly encouraged** to first go to the main table for check in. If they are new to the market, they will go to the new attendee line for registration and if they are already a registered attendee they will go through the return attendee line. For **"guest" attendees** (those who refuse to go through the registration first), vendors can still sell to them. In this case, vendors must access the Transaction Form through the Vendor Portal of the website. Enter the code **GUEST99** in the Neighbor ID field of the form and complete all remaining form questions. Be sure to let the guest attendee know that they must pay with either cash or card.

Only registered attendees have a mobile wallet, and that mobile wallet is the only way to use the market benefits. The mobile wallet will only have benefits in it that attendees can shop with if either 1) they are a Wallace client, 2) they are a SNAP recipient and have SNAP+ dollars loaded on their mobile wallet, or 3) they have received PGL or Community Bucks. Note that all physical bucks (except SNAP+) that attendees receive must first be converted into mobile wallet bucks at the main check-in table, otherwise they cannot be spent. Attendees paying with SNAP will use the mobile wallet system and the designated physical yellow tokens for payment. The Transaction Form will indicate how many SNAP+ tokens the vendor is to collect from the attendee based on the amount of SNAP+ dollars being deducted from the attendee's mobile wallet in that transaction. Store the tokens securely and return them all to PGL at the end of the market.

Totaling Sales and Payment Reconciliation with PGL

At the end of the market day after the last transaction has been completed, vendors will login to the Vendor Portal to access the **End of Market Vendor Invoice Form**. They will complete this form as they close down their table and prepare to leave. This form will auto-retrieve their total sales information for that market day and display it by payment type (including totals for each benefit). Once the Form is completed and submitted (on submission page, the vendor must enter their Vendor PIN to confirm submission) the vendor can proceed to the main table for check-out and payment reconciliation with PGL. Note that there is no way to "undo" the submitted End of Market Invoice Form, so ensure that the Form is filled out correctly.

Post Market Information for Market Vendors

Once they have submitted the End of Market Vendor Invoice Form, vendors are to go to the main table to reconcile payment with PGL and return any rental equipment. PGL will complete a form there during check-out with the vendor that auto-populates the total invoice amount due to the vendor based on their

sale subtotals for each benefit. Vendors give all collected SNAP+ tokens to PGL, who then counts them to verify that the total matches the total number that the form indicates they have collected.

System Use Instructions for Funders

Funders are requested to complete the **Funder Payment Remittance Form** once they receive each invoice from PGL. This is a short form that takes very little time to complete. It helps with documentation, transparency and planning purposes for PGL and the vendors who both rely on timely payment remittance from funders. This is the only form that funders are asked to complete, and they will complete it once per invoice received. This form can be accessed within the Funder Portal on the website.

Back-up Paper System

If the PGL team experiences technical failures during the market, there is a back-up paper-based process. The main technical failure that would threaten dashboard usage is no wifi access. This paper-based system should only be used in the event of this type of emergency; it is a last resort option that will require extra careful attention to detail and after-market manual entry of the data into the corresponding PMDS digital forms by the PGL staff.

The backup process relies on paper-based documentation and the same color-coded token system as Market Year 1. In order to remain prepared for a technical failure, the following items should be brought to **all** markets:

- Printed forms (9 types total)
- Folders (for organizing blank and completed forms by form type)
- Pens
- Clipboards
- Tokens

    - Note: Bring all 4 colors; If the paper-based system is activated, use all 4 color tokens to correspond to Wallace Bucks (red), Community Bucks (green), PGL Bucks (blue), and SNAP+ Bucks (yellow) where each token is worth $2. Outside of an emergency scenario, only yellow tokens will be used at the market.
- Token bags

The paper forms in this process include:

- PGL Staff Clock in and Clock Out Form
- Attendee Registration Form
- Returning Attendee Form (half sheets)
- Vendor Sign-in and Sign-out Form
- CSA Enrollment Form (Half sheet)
- CSA Pickup Form
- PGL Item Sales Log
- Vendor Transaction Form
- End of Market Invoice Form

Once the market is complete, PGL staff will manually upload the data from these forms into the corresponding digital data-input forms.

It is important that PGL clearly (and immediately) indicate to all vendors and attendees when the **paper-based system** has been activated (e.g. over a loudspeaker). No can simply decide to start using the paper-based system whenever they want to; this is something that only authorized PGL personnel can determine and it must be done ONLY in the event of an emergency, such as if the internet goes out and cannot be reactivated quickly. If this happens, PGL personnel should pass out paper copies of the Vendor Transaction Form and End of Market Invoice Form to all vendors, and it should begin using the corresponding paper forms at the registration, CSA, and PGL Sales tables. PGL must ensure that all vendors know exactly what to do and that they have pens for writing on the paper forms.

Also, PGL must make sure that attendees with benefits who will be doing any remaining shopping have enough physical tokens to correspond with their current account balance and/or the amount of their current balance that they anticipate spending at the market that day. This process could get very complicated very quickly, so it is best to avoid using the paper process at all if possible. To avoid this scenario, ensure that the wifi hotspot maintains a strong connection, and that you have a back-up wifi option in place if that one goes out. Also ensure that all vendors have a smartphone to process transactions; that should be a standing expectation of all vendors for every market day.

Policy Considerations

The following list contains **key administrative and logistics related policies** that all PMDS users (especially PGL and vendors) need to be aware of and must operationalize in the market to maximize success.

Attendee Sign In:

- Verify that person using the virtual ID card matches one of the names listed on the virtual ID card.
- Attendees can only go through the registration and check-in line ONCE per market for loading their mobile wallet (this includes SNAP+ recipients).
- Wallace recipients must present the required Wallace text message to be registered with Wallace. Once registered with Wallace they no longer need to present ID, but any new Wallace recipient will.
- Every registered family can have up to 4 additional family members on their account which allows them to shop using the same Market account and a shared set of benefits. This is a built-in component of the PMDS.
- Every SNAP+ token is worth $2 (previously $5). Tokens cannot be shared and exchanged; only what is reflected in the mobile wallet can be transacted and transactions only occur through the transaction form.

- There is a 200 person cap for Community Bucks (the first 200 people who sign in at the market as new or returning attendees); do not hand out more than that amount or someone will be disappointed because they cannot use them.
- Any PGL Bucks and Community Bucks that people are going to use at the market <u>must be in hand</u> before the get to the front of the registration/check-in line. Anything handed out to them after that point will not be in their mobile wallet and therefore cannot be spent at the market.
- SNAP dollars converted at the market can only be loaded to the wallet in whole dollar amounts (no cents).

CSA:

- If 2 consecutive weeks of pick up have been missed by a CSA enrollee then they are dropped from the list. PGL must ensure that they notify the dropped attendee, that they are keeping a waitlist of members to add (along with the other information necessary to complete the enrollment form), and that each person added from the waitlist is enrolled through the CSA enrollment form (and notified of their enrollment).
- CSA 5+ equals a large bag (this is automated within the CSA Pick-up form, but will also need to be adhered to in the event the emergency paper system being activated).
- CSA bags should be preassembled before the market begins, which ensures that the process of pick-up is smooth, efficient, and successful.

Transactions:

- Hot food vendors can take all payment forms. Non-produce vendors (retailers, educators and entertainers)- can only accept PGL bucks (and cash/card).

- SNAP+ tokens are $2 each. No other physical benefits (Wallace Bucks, PGL Bucks and Community Bucks) can be transacted with vendors; these are all transacted digitally through the mobile wallet.

Payment Invoice and Remittance:

- Funder Invoice (make sure to reach out to all funders to confirm their willingness to complete the requested form)
- The number of physical SNAP tokens must correspond to balance in their mobile wallet. If the numbers are off, the physical token total takes precedent.
- Incorrect SNAP balances: Attendees SNAP+ balance is reflected in the mobile wallet. Regardless of how many tokens an attendee has (it's possible for people to try to "share" physical tokens), the vendor cannot take more from an attendee during a transaction than the Transaction Form shows that the attendee has in their PMDS mobile wallet.

PMDS Use Tips

- Use of the tooltip feature in the forms and dashboards for more information.
- The forms in the PMDS are to be completed only *when* and *by whom* instructed. See the instructions contained within the forms, this user guide, and the training presentation slides for more information.
- Utilize the back-up paper-based system when emergencies arise. Keep copies and pens on hand at the market at all times just in case.
- Utilize the other recommendations provided in the Year 2 Needs Assessment and Recommendations report to maximize year 2 market success (PGL and REACH specifically)
- **Do NOT to share ANY passwords, PINs or other ID numbers** that you have been given for accessing and using the PMDS. Doing so many compromise the security of not only your data but that of others.

System Troubleshooting

The PMDS will be beta-tested through Year 2 implementation of the People's Market. This means that we anticipate the need to troubleshoot challenges that may arise along the way in the use of this system. In the following sections, we describe the materials that we have made available to support the training of vendors, market manager staff, and funders in the use of this system. We also describe our technical assistance policy, which enables PGL and REACH to access the direct support of our IT team.

The first and best solution to navigating any questions or challenges in using the PMDS is to refer to this PMDS User Guide, which will be updated regularly. Always refer to the latest version available; this will be accessible through the QR code shared in the initial PMDS training.

Training Materials and Technical Assistance

Training is key to helping all vendors and funders know how to use the system. In addition to this user guide, PGL can utilize the recording of the training presented on June 9, 2025, and the interactive system diagram linked here.

Technical assistance requests can also be submitted through the form embedded on the website also available here. Only PGL can submit technical assistance requests to our team. All vendors and funders should contact a representative from PGL if you need help with something. If they cannot answer your question, they will reach out to us. Please allow 2-3 business days for our response. If your request is urgent, there is a space on the form to indicate that and we will follow-up directly with PGL via email or by phone.

Conclusion

The PMDS was designed and developed to improve the the year 2 implementation of the People's Market. Remember that much of the PMDS is

still being refined. We will be making adjustments to the system throughout the summer. Any major changes will be announced and reflected in the latest version of this user guide, which you can always find through the PMDS Resources QR code located in the training materials and on the last page of this document. For this reason, we suggest that you do NOT rely on a downloaded version the user guide but rather access it through the QR code anytime you need it because that way you will always be looking at the latest version of it.

Acknowledgements

The PMDS was made possible through funding from the UC Office of Research and the UC Taft Research Center. Special thank you to the scholars of the UC Homegrown Community and Technology Design Lab under the leadership of Dr. Lauren Forbes at the University of Cincinnati School of Public and International Affairs: Sai Meenakshi Hariharan, Joy Kostansek, Venkat Sai Subash Panchakarla, Venkata Guna Sundhar Grandhe, and Siddharth Urankar. Also, thank you to Dr. Annu Prabhakar, Dr. Kelly Merrill, Kassius Broadus, Richard Harknett, and Evajean O'Neal.
